Riddle Time!

**What has rivers
with no water,
forests, but no trees,
and cities
with no buildings?**

answer: A Map

Science Technology Engineering Math

Everyone remembers Woodshop! Students use a variety of tools.

They learn- safety techniques- design- assembly- spatial perception- concentration- small motor skills- to follow directions- to think for themselves.

Participants feel a sense of accomplishment and pride as they build their project and watch it develop into something recognizable.

During the process they are both learning and having fun. We teach basic woodshop skills with a focus on safety.

The knowledge gained in this course will be useful to them throughout their lives.

"Thank you so much for your efforts and expertise. We are very lucky to have you here, and I especially love working with you."

-Sarah, School program director

"My daughter loved this class! She would come home every night and explain in great detail what tools she used, how she used them and brag about her progress." -Genevieve, parent
